Credit risk factors

Needs attention

The underlying criteria that credit bureaus use to calculate the credit score.

- Positive impact: 1
- Negative impact: 5
- Neutral impact: 8

Risk factors

Annual accounts

Last accounts filed 31st October 2022

Negative Impact

Based on your latest publicly filed financial statements at Companies House.

Accounts filing overdue

The company's accounts are overdue for filing. Late filing of company accounts negatively impacts your credit score, so ensure these are filed urgently.

● Negative

Regular accounts filing

Filing your annual company accounts in a regular pattern is sign of good behaviour in the eyes of Credit Reference Agencies like Experian, as it demonstrates consistency in your business activities.

● Neutral

Small asset base

An asset-light business can offer advantages in terms of flexibility and efficiency, but it may also expose a company to certain risks, such as reliance on external suppliers and a lack of collateral that can be leveraged by lenders to mitigate their risks when extending credit.

● Negative

Poor liquidity for working capital

A small current asset base relative to company turnover suggests that the business has insufficient liquidity to support its day-to-day operations. This raises concerns about the company's ability to meet its short-term obligations without relying excessively on external financing.

● Negative

Balanced financial leverage

A balanced gearing ratio suggests that the company has relatively equal proportions of equity or assets relative to debt. A favourable gearing ratio indicates financial stability, as the company relies more on equity financing and has lower levels of debt relative to its assets.

● Neutral

Decline in shareholders' funds

A decrease in shareholders' funds typically occurs when the company incurs losses, which reduces the proportion of equity in the business. This indicates financial instability in the business through declining profits or capital reductions.

● Negative

Company information

Negative Impact

Overview of your company's general information declared on your annual confirmation statement.

Company filings up to date

Good job! Company and director details are all up to date at Companies House. The company Confirmation Statement was filed on time, and must be filed at least once every 12 months, even if there are no changes to report.

● Neutral

Established for a short period

The company has been established and operating for a relatively short time compared to other companies of a similar size. This makes assessing financial stability, performance and reliability more difficult. ● Negative

Operating in a lower risk industry

The company is registered publicly and operating in what is considered to be a low risk sector of the economy. ● Neutral

Directors' Commercial Experience

Neutral Impact

Publicly held information on your current board of directors and a review of their past/present business activities.

Above average number of directors

The number of appointed directors is considered to be above average compared to other companies of a similar age and size. A larger number of directors suggests healthy growth in the business, which may benefit from a diverse range of expertise and experience. ● Neutral

Experienced board of directors

The average age of the company's board of directors is older compared to other companies of a similar size or age. This suggests that the business can benefit from a diverse range of expertise and experience. ● Neutral

Payment performance

Positive Impact

How your company performs when making payments to suppliers and whether you are settling within or beyond terms.

Quicker payments compared to industry average

The settlement of trade credit is on average quicker compared to other companies of a similar age and size. ● Positive
