Risk factors

Annual accounts

Last accounts filed 30th April 2023

Negative Impact

Based on your latest publicly filed financial statements at Companies House.

Accounts filed on time

Good job! The company's accounts were filed at Companies House on time. Make sure you continue to file your accounts in a timely manner.

• Neutral

Regular accounts filing

Filing your annual company accounts in a regular pattern is sign of good behaviour in the eyes of Credit Reference Agencies like Experian, as it demonstrates consistency in your business activities.

• Neutral

Large asset base

A sizable asset base can indicate that a company has reached a certain level of stability and maturity in its industry. A solid asset base can be deemed as a foundation to support ongoing operations and growth initiatives, and can provide valuable collateral that lenders can use to mitigate their risks when extending credit.

• Positive

Poor liquidity for working capital

A small current asset base relative to company turnover suggests that the business has insufficient liquidity to support its day-to-day operations. This raises concerns about the company's ability to meet its short-term obligations without relying excessively on external financing.

• Negative

Balanced financial leverage

A balanced gearing ratio suggests that the company has relatively equal proportions of equity or assets relative to debt. A favourable gearing ratio indicates financial stability, as the company relies more on equity financing and has lower levels of debt relative to its assets.

• Neutral

Decline in shareholders' funds

A decrease in shareholders' funds typically occurs when the company incurs losses, which reduces the proportion of equity in the business. This indicates financial instability in the business through declining profits or capital reductions.

• Negative
